# CAT 2023

Application No	 CAT - MBA   IPMAT - BBA	
Candidate Name		
Test Center Name		
Test Date		
Test Time		4:30 PM - 6:30 PM
Subject		CAT 2023

Note - Answer Keys provided in this candidate response sheet are provisional.

Section : VARC

### Comprehension:

The passage below is accompanied by four questions. Based on the passage, choose the best answer for each question.

The biggest challenge [The Nutmeg's Curse by Ghosh] throws down is to the prevailing understanding of when the climate crisis started. Most of us have accepted . . . that it started with the widespread use of coal at the beginning of the Industrial Age in the 18<sup>th</sup> century and worsened with the mass adoption of oil and natural gas in the 20<sup>th</sup>.

Ghosh takes this history at least three centuries back, to the start of European colonialism in the 15<sup>th</sup> century. He [starts] the book with a 1621 massacre by Dutch invaders determined to impose a monopoly on nutmeg cultivation and trade in the Banda islands in today's Indonesia. Not only do the Dutch systematically depopulate the islands through genocide, they also try their best to bring nutmeg cultivation into plantation mode. These are the two points to which Ghosh returns through examples from around the world. One, how European colonialists decimated not only indigenous populations but also indigenous understanding of the relationship between humans and Earth. Two, how this was an invasion not only of humans but of the Earth itself, and how this continues to the present day by looking at nature as a 'resource' to exploit. . . .

We know we are facing more frequent and more severe heatwaves, storms, floods, droughts and wildfires due to climate change. We know our expansion through deforestation, dam building, canal cutting – in short, terraforming, the word Ghosh uses – has brought us repeated disasters . . . Are these the responses of an angry Gaia who has finally had enough? By using the word 'curse' in the title, the author makes it clear that he thinks so. I use the pronoun 'who' knowingly, because Ghosh has quoted many non-European sources to enquire into the relationship between humans and the world around them so that he can question the prevalent way of looking at Earth as an inert object to be exploited to the maximum.

As Ghosh's text, notes and bibliography show once more, none of this is new. There have always been challenges to the way European colonialists looked at other civilisations and at Earth. It is just that the invaders and their myriad backers in the fields of economics, politics, anthropology, philosophy, literature, technology, physics, chemistry, biology have dominated global intellectual discourse. . . .

There are other points of view that we can hear today if we listen hard enough. Those observing global climate negotiations know about the Latin American way of looking at Earth as Pachamama (Earth Mother). They also know how such a framing is just provided lip service and is ignored in the substantive portions of the negotiations. In The Nutmeg's Curse, Ghosh explains why. He shows the extent of the vested interest in the oil economy – not only for oil-exporting countries, but also for a superpower like the US that controls oil drilling, oil prices and oil movement around the world. Many of us know power utilities are sabotaging decentralised solar power generation today because it hits their revenues and control. And how the other points of view are so often drowned out.

#### SubQuestion No : 1

**Q.1 All of the following can be inferred from the reviewer's discussion of "The Nutmeg's Curse", EXCEPT:**

- Ans**
- 1. environmental preservation policy makers can learn a lot from non-European and/or pre-colonial societies.
  - 2. the contemporary dominant perception of nature and the environment was put in place by processes of colonialism.
  - 3. the history of climate change is deeply intertwined with the history of colonialism.
  - 4. academic discourses have always served the function of raising awareness about environmental preservation.

Many of us know power utilities are sabotaging decentralised solar power generation today because it hits their revenues and control. And how the other points of view are so often drowned out.

#### SubQuestion No : 2

**Q.2 Which one of the following, if true, would make the reviewer's choice of the pronoun "who" for Gaia inappropriate?**

- Ans  1. Ghosh's book has a different title: "The Nutmeg's Revenge".
2. There is a direct cause-effect relationship between human activities and global climate change.
3. Non-European societies have perceived the Earth as a non-living source of all resources.
4. Modern western science discovers new evidence for the Earth being an inanimate object.

#### SubQuestion No : 4

**Q.4 Which one of the following best explains the primary purpose of the discussion of the colonisation of the Banda islands in "The Nutmeg's Curse"?**

**Ans**  1. To illustrate how colonialism represented and perpetuated the mindset that has led to climate change.

2. To illustrate the role played by the cultivation of certain crops in the plantation mode in contributing to climate change.

3. To illustrate how systemic violence against the colonised constituted the cornerstone of colonialism.

4. To illustrate the first instance in history when the processes responsible for climate change were initiated.

### Comprehension:

The passage below is accompanied by four questions. Based on the passage, choose the best answer for each question.

Understanding romantic aesthetics is not a simple undertaking for reasons that are internal to the nature of the subject. Distinguished scholars, such as Arthur Lovejoy, Northrop Frye and Isaiah Berlin, have remarked on the notorious challenges facing any attempt to define romanticism. Lovejoy, for example, claimed that romanticism is “the scandal of literary history and criticism” . . . The main difficulty in studying the romantics, according to him, is the lack of any “single real entity, or type of entity” that the concept “romanticism” designates. Lovejoy concluded, “the word ‘romantic’ has come to mean so many things that, by itself, it means nothing” . . .

The more specific task of characterizing romantic aesthetics adds to these difficulties an air of paradox. Conventionally, “aesthetics” refers to a theory concerning beauty and art or the branch of philosophy that studies these topics. However, many of the romantics rejected the identification of aesthetics with a circumscribed domain of human life that is separated from the practical and theoretical domains of life. The most characteristic romantic commitment is to the idea that the character of art and beauty and of our engagement with them should shape all aspects of human life. Being fundamental to human existence, beauty and art should be a central ingredient not only in a philosophical or artistic life, but also in the lives of ordinary men and women. Another challenge for any attempt to characterize romantic aesthetics lies in the fact that most of the romantics were poets and artists whose views of art and beauty are, for the most part, to be found not in developed theoretical accounts, but in fragments, aphorisms and poems, which are often more elusive and suggestive than conclusive.

Nevertheless, in spite of these challenges the task of characterizing romantic aesthetics is neither impossible nor undesirable, as numerous thinkers responding to Lovejoy’s radical skepticism have noted. While warning against a reductive definition of romanticism, Berlin, for example, still heralded the need for a general characterization: “[Although] one does have a certain sympathy with Lovejoy’s despair...[he is] in this instance mistaken. There was a romantic movement...and it is important to discover what it is” . . .

Recent attempts to characterize romanticism and to stress its contemporary relevance follow this path. Instead of overlooking the undeniable differences between the variety of romanticisms of different nations that Lovejoy had stressed, such studies attempt to characterize romanticism, not in terms of a single definition, a specific time, or a specific place, but in terms of “particular philosophical questions and concerns” . . .

While the German, British and French romantics are all considered, the central protagonists in the following are the German romantics. Two reasons explain this focus: first, because it has paved the way for the other romanticisms, German romanticism has a pride of place among the different national romanticisms . . . Second, the aesthetic outlook that was developed in Germany roughly between 1796 and 1801–02 — the period that corresponds to the heyday of what is known as “Early Romanticism” . . . — offers the most philosophical expression of romanticism since it is grounded primarily in the epistemological, metaphysical, ethical, and political concerns that the German romantics discerned in the aftermath of Kant’s philosophy.

### SubQuestion No : 5

**Q.5 Which one of the following statements is NOT supported by the passage?**

- Ans**  1. Many romantics rejected the idea of aesthetics as a domain separate from other aspects of life.
2. Romantic aesthetics are primarily expressed through fragments, aphorisms, and poems.
3. Recent studies on romanticism seek to refute the differences between national romanticisms.
4. Characterising romantic aesthetics is both possible and desirable, despite the challenges involved.

### Comprehension:

The passage below is accompanied by four questions. Based on the passage, choose the best answer for each question.

Steven Pinker's new book, "Rationality: What It Is, Why It Seems Scarce, Why It Matters," offers a pragmatic dose of measured optimism, presenting rationality as a fragile but achievable ideal in personal and civic life. . . . Pinker's ambition to illuminate such a crucial topic offers the welcome prospect of a return to sanity. . . . It's no small achievement to make formal logic, game theory, statistics and Bayesian reasoning delightful topics full of charm and relevance.

It's also plausible to believe that a wider application of the rational tools he analyzes would improve the world in important ways. His primer on statistics and scientific uncertainty is particularly timely and should be required reading before consuming any news about the [COVID] pandemic. More broadly, he argues that less media coverage of shocking but vanishingly rare events, from shark attacks to adverse vaccine reactions, would help prevent dangerous overreactions, fatalism and the diversion of finite resources away from solvable but less-dramatic issues, like malnutrition in the developing world.

It's a reasonable critique, and Pinker is not the first to make it. But analyzing the political economy of journalism — its funding structures, ownership concentration and increasing reliance on social media shares — would have given a fuller picture of why so much coverage is so misguided and what we might do about it.

Pinker's main focus is the sort of conscious, sequential reasoning that can track the steps in a geometric proof or an argument in formal logic. Skill in this domain maps directly onto the navigation of many real-world problems, and Pinker shows how greater mastery of the tools of rationality can improve decision-making in medical, legal, financial and many other contexts in which we must act on uncertain and shifting information. . . .

Despite the undeniable power of the sort of rationality he describes, many of the deepest insights in the history of science, math, music and art strike their originators in moments of epiphany. From the 19<sup>th</sup>-century chemist Friedrich August Kekulé's discovery of the structure of benzene to any of Mozart's symphonies, much extraordinary human achievement is not a product of conscious, sequential reasoning. Even Plato's Socrates — who anticipated many of Pinker's points by nearly 2,500 years, showing the virtue of knowing what you do not know and examining all premises in arguments, not simply trusting speakers' authority or charisma — attributed many of his most profound insights to dreams and visions. Conscious reasoning is helpful in sorting the wheat from the chaff, but it would be interesting to consider the hidden aquifers that make much of the grain grow in the first place.

The role of moral and ethical education in promoting rational behavior is also underexplored. Pinker recognizes that rationality "is not just a cognitive virtue but a moral one." But this profoundly important point, one subtly explored by ancient Greek philosophers like Plato and Aristotle, doesn't really get developed. This is a shame, since possessing the right sort of moral character is arguably a precondition for using rationality in beneficial ways.

### SubQuestion No : 9

**Q.9 The author refers to the ancient Greek philosophers to:**

- Ans**  1. reveal gaps in Pinker's discussion of the importance of ethical considerations in rational behaviour.
2. show how dreams and visions have for centuries influenced subconscious behaviour and pathbreaking inventions.
3. indicate the various similarities between their thinking and Pinker's conclusions.
4. highlight the influence of their thinking on the development of Pinker's arguments.

Question Type : **MCQ**

Question ID : **48916815978**

Option 1 ID : **48916839728**

Option 2 ID : **48916839727**

Option 3 ID : **48916839726**

Option 4 ID : **48916839725**

Status : **Answered**

Chosen Option : **1**

### Comprehension:

The passage below is accompanied by four questions. Based on the passage, choose the best answer for each question.

Steven Pinker's new book, "Rationality: What It Is, Why It Seems Scarce, Why It Matters," offers a pragmatic dose of measured optimism, presenting rationality as a fragile but achievable ideal in personal and civic life. . . . Pinker's ambition to illuminate such a crucial topic offers the welcome prospect of a return to sanity. . . . It's no small achievement to make formal logic, game theory, statistics and Bayesian reasoning delightful topics full of charm and relevance.

It's also plausible to believe that a wider application of the rational tools he analyzes would improve the world in important ways. His primer on statistics and scientific uncertainty is particularly timely and should be required reading before consuming any news about the [COVID] pandemic. More broadly, he argues that less media coverage of shocking but vanishingly rare events, from shark attacks to adverse vaccine reactions, would help prevent dangerous overreactions, fatalism and the diversion of finite resources away from solvable but less-dramatic issues, like malnutrition in the developing world.

It's a reasonable critique, and Pinker is not the first to make it. But analyzing the political economy of journalism — its funding structures, ownership concentration and increasing reliance on social media shares — would have given a fuller picture of why so much coverage is so misguided and what we might do about it.

Pinker's main focus is the sort of conscious, sequential reasoning that can track the steps in a geometric proof or an argument in formal logic. Skill in this domain maps directly onto the navigation of many real-world problems, and Pinker shows how greater mastery of the tools of rationality can improve decision-making in medical, legal, financial and many other contexts in which we must act on uncertain and shifting information. . . .

But this profoundly important point, one subtly explored by ancient Greek philosophers like Plato and Aristotle, doesn't really get developed. This is a shame, since possessing the right sort of moral character is arguably a precondition for using rationality in beneficial ways.

#### SubQuestion No : 10

**Q.10 The author endorses Pinker's views on the importance of logical reasoning as it:**

- Ans
- 1. provides a moral compass for resolving important ethical dilemmas.
  - 2. helps people to gain expertise in statistics and other scientific disciplines.
  - 3. equips people with the ability to tackle challenging practical problems.
  - 4. focuses public attention on real issues like development rather than sensational events.

This is a shame, since possessing the right sort of moral character is arguably a precondition for using rationality in beneficial ways.

### SubQuestion No : 11

**Q.11 According to the author, for Pinker as well as the ancient Greek philosophers, rational thinking involves all of the following EXCEPT:**

- Ans**  1. an awareness of underlying assumptions in an argument and gaps in one's own knowledge.
2. the primacy of conscious sequential reasoning as the basis for seminal human achievements.
3. arriving at independent conclusions irrespective of who is presenting the argument.
4. the belief that the ability to reason logically encompasses an ethical and moral dimension.

But this profoundly important point, one subtly explored by ancient Greek philosophers like Plato and Aristotle, doesn't really get developed. This is a shame, since possessing the right sort of moral character is arguably a precondition for using rationality in beneficial ways.

### SubQuestion No : 12

**Q.12 The author mentions Kekulé's discovery of the structure of benzene and Mozart's symphonies to illustrate the point that:**

**Ans**  1.

great innovations across various fields can stem from flashes of intuition and are not always propelled by logical thinking.

2.

unlike the sciences, human achievements in other fields are a mix of logical reasoning and spontaneous epiphanies.

3.

Pinker's conclusions on sequential reasoning are belied by European achievements which, in the past, were more rooted in unconscious bursts of genius.

4.

it is not just the creative arts, but also scientific fields that have benefitted from flashes of creativity.

### Comprehension:

The passage below is accompanied by four questions. Based on the passage, choose the best answer for each question.

In 2006, the Met [art museum in the US] agreed to return the Euphronios krater, a masterpiece Greek urn that had been a museum draw since 1972. In 2007, the Getty [art museum in the US] agreed to return 40 objects to Italy, including a marble Aphrodite, in the midst of looting scandals. And in December, Sotheby's and a private owner agreed to return an ancient Khmer statue of a warrior, pulled from auction two years before, to Cambodia.

Cultural property, or patrimony, laws limit the transfer of cultural property outside the source country's territory, including outright export prohibitions and national ownership laws. Most art historians, archaeologists, museum officials and policymakers portray cultural property laws in general as invaluable tools for counteracting the ugly legacy of Western cultural imperialism.

During the late 19<sup>th</sup> and early 20<sup>th</sup> century — an era former Met director Thomas Hoving called "the age of piracy" — American and European art museums acquired antiquities by hook or by crook, from grave robbers or souvenir collectors, bounty from digs and ancient sites in impoverished but art-rich source countries. Patrimony laws were intended to protect future archaeological discoveries against Western imperialist designs. . . .

I surveyed 90 countries with one or more archaeological sites on UNESCO's World Heritage Site list, and my study shows that in most cases the number of discovered sites diminishes sharply after a country passes a cultural property law. There are 222 archaeological sites listed for those 90 countries. When you look into the history of the sites, you see that all but 21 were discovered before the passage of cultural property laws. . . .

Strict cultural patrimony laws are popular in most countries. But the downside may be that they reduce incentives for foreign governments, nongovernmental organizations and educational institutions to invest in overseas exploration because their efforts will not necessarily be rewarded by opportunities to hold, display and study what is uncovered. To the extent that source countries can fund their own archaeological projects, artifacts and sites may still be discovered. . . . The survey has far-reaching implications. It suggests that source countries, particularly in the developing world, should narrow their cultural property laws so that they can reap the benefits of new archaeological discoveries, which typically increase tourism and enhance cultural pride. This does not mean these nations should abolish restrictions on foreign excavation and foreign claims to artifacts.

China provides an interesting alternative approach for source nations eager for foreign archaeological investment. From 1935 to 2003, China had a restrictive cultural property law that prohibited foreign ownership of Chinese cultural artifacts. In those years, China's most significant archaeological discovery occurred by chance, in 1974, when peasant farmers accidentally uncovered ranks of buried terra cotta warriors, which are part of Emperor Qin's spectacular tomb system.

In 2003, the Chinese government switched course, dropping its cultural property law and embracing collaborative international archaeological research. Since then, China has nominated 11 archaeological sites for inclusion in the World Heritage Site list, including eight in 2013, the most ever for China.

#### SubQuestion No : 13

**Q.13 It can be inferred from the passage that archaeological sites are considered important by some source countries because they:**

- Ans**
- 1. give a boost to the tourism sector.
  - 2. are a symbol of Western imperialism.
  - 3. are subject to strict patrimony laws.
  - 4. generate funds for future discoveries.

Question Type : **MCQ**

#### SubQuestion No : 14

**Q.14 Which one of the following statements best expresses the paradox of patrimony laws?**

- Ans  1. They were intended to protect cultural property, but instead resulted in the neglect of historical sites.
2. They were aimed at protecting cultural property, but instead reduced new archaeological discoveries.
3. They were aimed at protecting cultural property, but instead reduced business for auctioneers like Sotheby's.
4. They were intended to protect cultural property, but instead resulted in the withholding of national treasure from museums.

Since then, China has nominated 11 archaeological sites for inclusion in the World Heritage Site list, including eight in 2013, the most ever for China.

#### SubQuestion No : 16

**Q.16 From the passage we can infer that the author is likely to advise poor, but archaeologically-rich source countries to do all of the following, EXCEPT:**

- Ans**  1. to find ways to motivate other countries to finance archaeological explorations in their country.
2. fund institutes in other countries to undertake archaeological exploration in the source country reaping the benefits of cutting-edge techniques.
3. adopt China's strategy of dropping its cultural property laws and carrying out archaeological research through international collaboration.
4. allow foreign countries to analyse and exhibit the archaeological finds made in the source country.

Question Type : **MCQ**

Question ID : **48916816126**

Option 1 ID : **48916840204**

Option 2 ID : **48916840203**

Option 3 ID : **48916840201**

Option 4 ID : **48916840202**

Status : **Not Answered**

**Q.17** There is a sentence that is missing in the paragraph below. Look at the paragraph and decide where (option 1, 2, 3, or 4) the following sentence would best fit.

**Sentence:** For theoretical purposes, arguments may be considered as freestanding entities, abstracted from their contexts of use in actual human activities.

**Paragraph :** \_\_\_(1)\_\_. An argument can be defined as a complex symbolic structure where some parts, known as the premises, offer support to another part, the conclusion. Alternatively, an argument can be viewed as a complex speech act consisting of one or more acts of premising (which assert propositions in favor of the conclusion), an act of concluding, and a stated or implicit marker (“hence”, “therefore”) that indicates that the conclusion follows from the premises. \_\_\_(2)\_\_. The relation of support between premises and conclusion can be cashed out in different ways: the premises may guarantee the truth of the conclusion, or make its truth more probable; the premises may imply the conclusion; the premises may make the conclusion more acceptable (or assertible). \_\_\_(3)\_\_. But depending on one’s explanatory goals, there is also much to be gained from considering arguments as they in fact occur in human communicative practices. \_\_\_(4)\_\_.

- Ans**
- 1. Option 4
  - 2. Option 1
  - 3. Option 2
  - 4. Option 3

Question Type : **MCQ**

Question ID : **48916816121**

Option 1 ID : **48916840191**

Option 2 ID : **48916840188**

Option 3 ID : **48916840189**

Option 4 ID : **48916840190**

Status : **Answered**

Chosen Option : **1**

**Q.18** There is a sentence that is missing in the paragraph below. Look at the paragraph and decide where (option 1, 2, 3, or 4) the following sentence would best fit.

**Sentence:** Beyond undermining the monopoly of the State on the use of force, armed conflict also creates an environment that can enable organized crime to prosper.

**Paragraph:** \_\_\_(1)\_\_. Linkages between illicit arms, organized crime, and armed conflict can reinforce one another while also escalating and prolonging violence and eroding governance. \_\_\_(2)\_\_. Financial gains from crime can lengthen or intensify armed conflicts by creating revenue streams for non-State armed groups (NSAGs). \_\_\_(3)\_\_. In this context, when hostilities cease and parties to a conflict move towards a peaceful resolution, the widespread availability of surplus arms and ammunition can contribute to a situation of ‘criminalized peace’ that obstructs sustainable peacebuilding efforts. \_\_\_(4)\_\_.

- Ans**
- 1. Option 2
  - 2. Option 1
  - 3. Option 3
  - 4. Option 4

Question Type : **MCQ**

Question ID : **48916816197**

Option 1 ID : **48916840448**

Option 2 ID : **48916840447**

Option 3 ID : **48916840449**

Option 4 ID : **48916840450**

Status : **Answered**

Chosen Option : **3**

**Q.19** Five jumbled up sentences (labelled 1, 2, 3, 4 and 5), related to a topic, are given below. Four of them can be put together to form a coherent paragraph. Identify the odd sentence and key in the number of that sentence as your answer.

1. Although hard skills have traditionally ruled the roost, some companies are moving away from choosing prospective hires based on technical abilities alone.
2. Companies are shaking off the old definition of an ideal candidate and ditching the idea of looking for the singularly perfect candidate altogether.
3. Now, some job descriptions are frequently asking for candidates to demonstrate soft skills, such as leadership or teamwork.
4. That's not to say that practical know-how is no longer required – some jobs still call for highly specific expertise
5. The move towards prioritising soft skills “is a natural response to three years of the pandemic” says a senior recruiter at Cenlar FSB.

**Q.20** Five jumbled up sentences (labelled 1, 2, 3, 4 and 5), related to a topic, are given below. Four of them can be put together to form a coherent paragraph. Identify the odd sentence and key in the number of that sentence as your answer.

1. Boa Senior, who lived through the 2004 tsunami, the Japanese occupation and diseases brought by British settlers, was the last native of the island chain who was fluent in Bo.
2. The indigenous population has been steadily collapsing since the island chain was colonised by British settlers in 1858 and used for most of the following 100 years as a colonial penal colony.
3. Taking its name from a now-extinct tribe, Bo is one of the 10 Great Andamanese languages, which are thought to date back to pre-Neolithic human settlement of south-east Asia.
4. The last speaker of an ancient tribal language has died in the Andaman Islands, breaking a 65,000-year link to one of the world's oldest cultures.
5. Though the language has been closely studied by researchers of linguistic history, Boa Senior spent the last few years of her life unable to converse with anyone in her mother tongue.

- Q.21** The four sentences (labelled 1, 2, 3 and 4) given below, when properly sequenced, would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer.
1. Centuries later formal learning is still mostly based on reading, even with the widespread use of other possible education-affecting technologies such as film, radio, and television.
  2. One of the immediate and recognisable impacts of the printing press was on how people learned; in the scribal culture it primarily involved listening, so memorization was paramount.
  3. The transformation of learners from listeners to readers was a complex social and cultural phenomenon, and it was not until the industrial era that the concept of universal literacy took root.
  4. The printing press shifted the learning process, as listening and memorisation gradually gave way to reading and learning no longer required the presence of a mentor; it could be done privately.

**Q.23** The passage given below is followed by four alternate summaries. Choose the option that best captures the essence of the passage.

The weight of society's expectations is hardly a new phenomenon but it has become particularly draining over recent decades, perhaps because expectations themselves are so multifarious and contradictory. The perfectionism of the 1950s was rooted in the norms of mass culture and captured in famous advertising images of the ideal white American family that now seem self-satirising. In that era, perfectionism meant seamlessly conforming to values, behaviour and appearance: chiselled confidence for men, demure graciousness for women. The perfectionist was under pressure to look like everyone else, only more so. The perfectionists of today, by contrast, feel an obligation to stand out through their idiosyncratic style and wit if they are to gain a foothold in the attention economy.

- Ans**
- 1. The image of perfectionism is reflected in and perpetuated by the media; and people do their best to adhere to these ideals.
  - 2. The pressure to appear perfect has been the cause of tension and conflict because the idea itself has been in a state of flux and hard to define.
  - 3. Though long-standing, the pressure to appear perfect and thereby attract attention, has evolved over time from one of conformism to one of non-conformism.
  - 4. The desire to attract attention is so deep-rooted in individual consciousness that people are willing to go to any lengths to achieve it.

Chosen Option : **3**

**Q.24** The passage given below is followed by four alternate summaries. Choose the option that best captures the essence of the passage.

Gradually, life for the island's birds is improving. Antarctic prions and white-headed petrels, which also nest in burrows, had managed to cling on in some sites while pests were on the island. Their numbers are now increasing. "It's fantastic and so exciting," Shaw says. As birds return to breed, they also poo. This adds nutrients to the soil, which in turn helps the plants to grow back stronger. Tall plants then help burrowing birds hide from predatory skuas. "It's this wonderful feedback loop," Shaw says. Today, the "pretty paddock" that Houghton first experienced has been transformed. "The tussock is over your head, and you're dodging all these penguin tunnels," she says. The orchids and tiny herb that had been protected by fencing have started turning up all over the place.

- Ans**
- 1. In the absence of pests, life on the island is now protected, and there has been a revival of a variety of birds and plants.
  - 2. Flowering plants, herbs and birds are now being protected on this wonderful Antarctic island.
  - 3. There is an increasing number of predatory birds and plants on the island despite the presence of pests which is a positive development.
  - 4. There is a huge positive transformation of the ecosystem of the island when brought under environmental protection.

**Comprehension:**

There are only three female students – Amala, Koli and Rini – and only three male students – Biman, Mathew and Shyamal – in a course. The course has two evaluation components, a project and a test. The aggregate score in the course is a weighted average of the two components, with the weights being positive and adding to 1.

The projects are done in groups of two, with each group consisting of a female and a male student. Both the group members obtain the same score in the project.

The following additional facts are known about the scores in the project and the test.

1. The minimum, maximum and the average of both project and test scores were identical – 40, 80 and 60, respectively.
2. The test scores of the students were all multiples of 10; four of them were distinct and the remaining two were equal to the average test scores.
3. Amala's score in the project was double that of Koli in the same, but Koli scored 20 more than Amala in the test. Yet Amala had the highest aggregate score.
4. Shyamal scored the second highest in the test. He scored two more than Koli, but two less than Amala in the aggregate.
5. Biman scored the second lowest in the test and the lowest in the aggregate.
6. Mathew scored more than Rini in the project, but less than her in the test.

**SubQuestion No : 1****Q.1 What was Rini's score in the project?**

Case Sensitivity: No

5. D3 and D4 sold an equal number of Window ACs and this number was one-third of the number of similar ACs sold by D2.
6. D2 and D3 were the only ones who sold Window Non-inverter ACs. The number of these ACs sold by D2 was twice the number of these ACs sold by D3.
7. D3 and D4 sold an equal number of Split Inverter ACs. This number was half the number of similar ACs sold by D2.

**SubQuestion No : 13**

**Q.13 What was the total number of ACs sold by D2 and D4?**

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 33

Given 26

Answer :

Question Type : SA

Question ID : 48916816356

Status : Answered

**Comprehension:**

An air conditioner (AC) company has four dealers – D1, D2, D3 and D4 in a city. It is evaluating sales performances of these dealers. The company sells two variants of ACs – Window and Split. Both these variants can be either Inverter type or Non-inverter type. It is known that of the total number of ACs sold in the city, 25% were of Window variant, while the rest were of Split variant. Among the Inverter ACs sold, 20% were of Window variant.

The following information is also known:

1. Every dealer sold at least two window ACs.
2. D1 sold 13 inverter ACs, while D3 sold 5 Non-inverter ACs.
3. A total of six Window Non-inverter ACs and 36 Split Inverter ACs were sold in the city.
4. The number of Split ACs sold by D1 was twice the number of Window ACs sold by it.
5. D3 and D4 sold an equal number of Window ACs and this number was one-third of the number of similar ACs sold by D2.
6. D2 and D3 were the only ones who sold Window Non-inverter ACs. The number of these ACs sold by D2 was twice the number of these ACs sold by D3.
7. D3 and D4 sold an equal number of Split Inverter ACs. This number was half the number of similar ACs sold by D2.

**SubQuestion No : 14**

**Q.14 Which of the following statements is necessarily false?**

- Ans**    ✓ 1. D1 and D3 together sold more ACs as compared to D2 and D4 together.
- ✗ 2. D4 sold more Split ACs as compared to D3.
- ✗ 3. D1 and D3 sold an equal number of Split ACs.
- ✗ 4. D2 sold the highest number of ACs.

**Comprehension:**

In a coaching class, some students register online, and some others register offline. No student registers both online and offline; hence the total registration number is the sum of online and offline registrations. The following facts and table pertain to these registration numbers for the five months – January to May of 2023. The table shows the minimum, maximum, median registration numbers of these five months, separately for online, offline and total number of registrations. The following additional facts are known.

1. In every month, both online and offline registration numbers were multiples of 10.
2. In January, the number of offline registrations was twice that of online registrations.
3. In April, the number of online registrations was twice that of offline registrations.
4. The number of online registrations in March was the same as the number of offline registrations in February.
5. The number of online registrations was the largest in May.

	Minimum	Maximum	Median
Online	40	100	80
Offline	30	80	50
Total	110	130	120

**SubQuestion No : 16**

**Q.16** What was the total number of registrations in April?

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 120

Chosen Option : --

Q.22

Suppose  $f(x, y)$  is a real-valued function such that  $f(3x + 2y, 2x - 5y) = 19x$ , for all real numbers  $x$  and  $y$ . The value of  $x$  for which  $f(x, 2x) = 27$ , is

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 3

Given 8

Answer :

Question Type : SA
